To: Community Associations Boards of Directors

Dear Directors;

I have recently met with Rebecca Dakin of the Federation of Calgary Communities to discuss the Energizing Spaces Fund that is being facilitated through them and funded by Enmax and would like to offer Trail Appliance's assistance in this process. Trail Appliances is a family owned company that has been serving Calgarians for the last forty years and is fully equipped to **supply, deliver, install and then haul away and recycle your old appliances.**

There are a few issues that need to be addressed before appliances are purchased and installed and I will note them below.

1. Refrigeration

If the fridge is being placed in the same place as the old one, the dimensions of that space need to be noted (interior width, height and depth) along with which way the door needs to swing (if applicable). If the fridge is freestanding then the decision becomes what type of fridge to replace with.

2. Cooking appliances

Dimensions for the range opening are needed and more importantly knowing whether the existing range is hard wired or has a standard range plug. If the range is hard wired, you will need to enlist the services of an electrician to ensure there is a proper range plug receptacle installed.

3. Dishwashers

Interior dimensions are also required for the dishwasher opening, and also whether or not the dishwasher is hard wired or plugged in.

Commercial appliances need to be purchased from a commercial distributor. The Federation has contact information.

When you are ready to get a quote for your replacement needs, you can call Danny Perla or Jeremy Janik at 403-253-5442 at our south store at 6880 11 St. S.E. to set up an appointment. Both Danny and Jeremy will be able to help you choose the right product. You can then make your application with the Federation and move forward from there.

Best Regards;

Rob Widdowson
