

ClimateReadyYYC Inspiration Toolkit

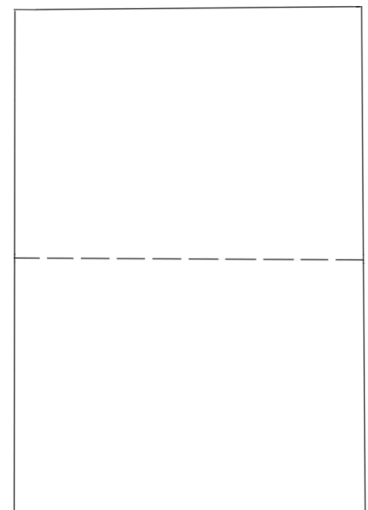

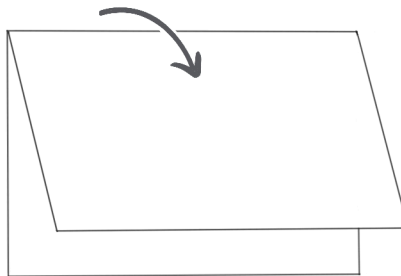

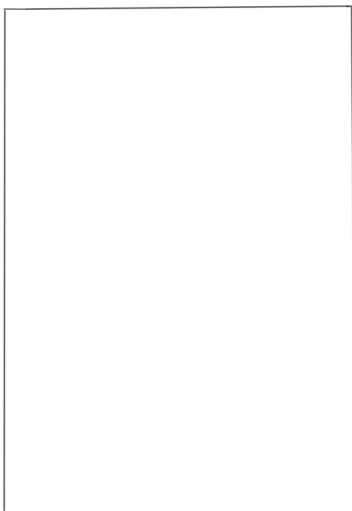

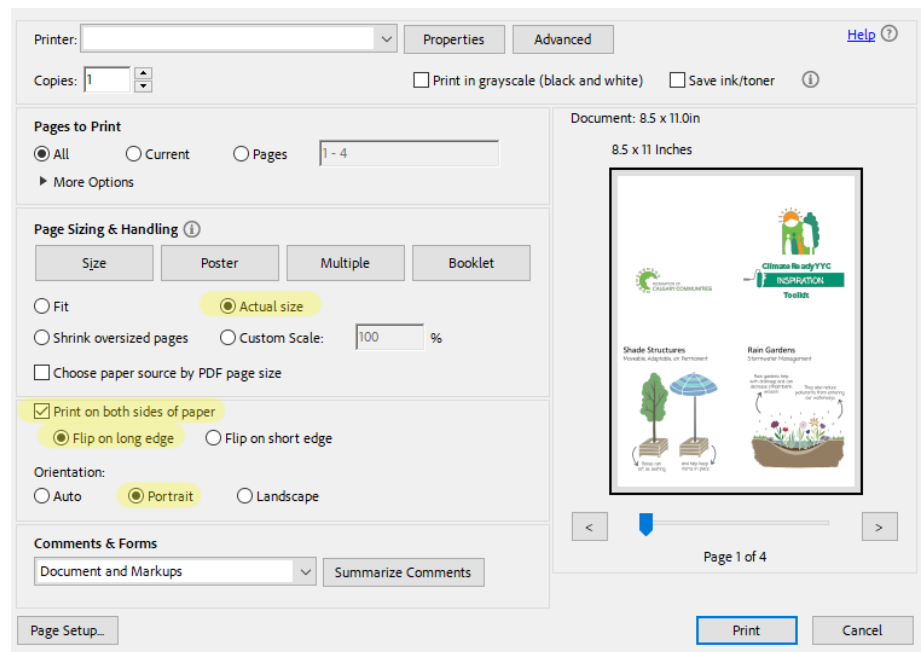

Assembly Guide

1. Print the attached pdf document with the following settings:

Set to print at actual size or on 8.5 x 11 inch paper.

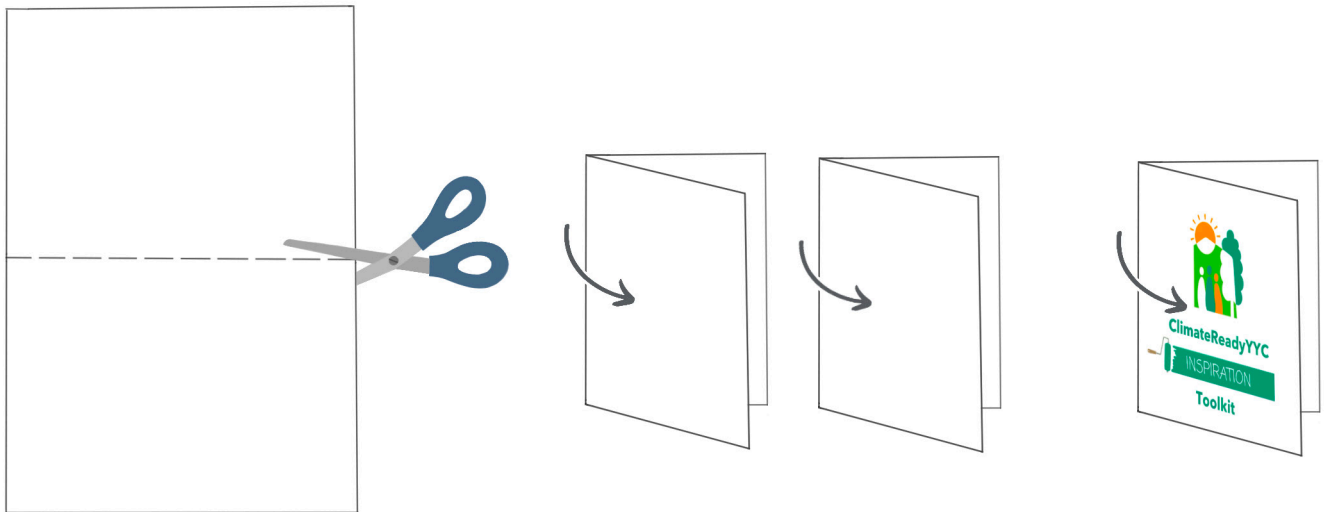

Select double sided printing, and flip on long edge.

Select portrait orientation and print in colour if desired.

2. Fold each piece of paper in half. Create a crease then unfold back to the original size.

3. Cut along the crease, creating two equal halves. If you have a paper cutter, this will make it easier to keep the cut straight and even.

4. Once cut, fold each section in half again. This will begin to create the pages of your book. For the cover page, make sure that you're creating the fold along the left side of the logo.

5. Take your cover page and insert the rest of the booklet pages like a file folder. Make sure that all of your pages face the same way and your titles are in line with each other.

6. Once your pages are stacked together, staple the spine or edge of the booklet to hold them in place.

You now have your own ClimateReadyYYC inspiration toolkit!
